

# Web Development for Web3 Agency

## PROJECT DETAILS

 Web Development

 Apr. 2024 - Ongoing

 \$10,000 to \$49,999

“*Their service, communication, and project management are spotless.*”

## PROJECT SUMMARY

A Web3 agency has hired Enlivy S.R.L. to build a WordPress plug-in for point farming. The app will incentivize users to engage on social media to gain points based on their actions and wallet holdings.

## PROJECT FEEDBACK

Although the project is still ongoing, Enlivy S.R.L. has delivered a well-functioning product that has had a positive impact on all figures. The team is understanding, professional, and highly committed. Overall, they go above and beyond for the client; customers can expect great results.

## The Client

Introduce your business and what you do there.

I'm the CEO of a Web3 agency. We started as a Web 2.0 marketing agency and did web development. In the end, we focused on Web3 and AI. We do NFTs, tokens, and all kinds of Web3 projects.

## The Challenge

What challenge were you trying to address with Enlivy S.R.L.?

We needed to build a point farming platform. We could've tried to build it ourselves, but we preferred to leave it to experts so we wouldn't make something fall.

### CLIENT RATING

**5.0**

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

Enlivity S.R.L. has developed a WordPress plug-in for point farming. Initially, we briefed them on what we do and our goals so they'd have a better understanding of how to get things done.

Point farming is gaining a lot of traction and turning into a common practice in the Web3 space. It's basically a social fight strategy that incentivizes people to engage on your socials by giving them points and multipliers based on their actions and wallet holdings.

### What is the team composition?

We have a main person, and he works with a second teammate for some parts of the project.

### How did you come to work with Enlivity S.R.L.?

We found them online.

### How much have you invested with them?

We've spent about \$12,000–\$13,000.

### What is the status of this engagement?

We began working with them in April 2024, and our partnership is ongoing. We'll definitely turn it into a long-term collaboration.

## The Outcome

### What evidence can you share that demonstrates the impact of the engagement?

Although the project is ongoing, we already have a functional product that works as it should. We've had some phenomenal increase in all figures, so it has achieved its purpose.

## How did Enlivity S.R.L. perform from a project management standpoint?

We've miscalculated things from our side a few times, but they've been very understanding and professional. They go the extra mile to make it work.

## Are there any employees from the service provider's team that you would like to give a shout-out to in this review?

We want to highlight Robert (Small Business Owner).

## What did you find most impressive about them?

Enlivity S.R.L. has gone the extra mile for us; we really appreciate it.

## Are there any areas they could improve?

No, I can't think of anything to improve. Their service, communication, and project management are spotless. We'd recommend them to anyone.

## Do you have any advice for potential customers?

Take your time to outline everything you need as well as possible. If anything is unclear to them, you should discuss it before drafting the tasks so they can understand what the project implies. In our case, we underestimated some parts of the project, which caused extra work on their side.
