

# Web App Dev & Design for Medical Company

## PROJECT DETAILS

 Custom Software Development, Web Design, Web Development

 Aug. 2022 - Ongoing

 \$10,000 to \$49,999

“  
*"They always have an answer to our inquiries."*

## PROJECT SUMMARY

A medical practice company has hired Enlivity S.R.L. for web development and design. Using PHP, CSS, and HTML, the team is building a WordPress-based plug-in for medical data assessment.

## PROJECT FEEDBACK

Enlivity S.R.L.'s work has helped the client reduce costs with their operations. Enlivity S.R.L.'s team is responsive and attentive, communicating via email and phone calls. The client highlights the client's skills and ability to understand their needs.

## The Client

Introduce your business and what you do there.

I'm a doctor and consultant at INSIDEMED, a medical practice company.

## The Challenge

What challenges were you trying to address with Enlivity S.R.L.?

We wanted someone based in Europe due to time zone matters who could help us design and develop a web application aimed at providing blood medical information. Moreover, we needed an English-speaking provider to avoid language barriers.

**Adriano Wassey**

Doctor & Consultant, INSIDE MED

Medical

Hamburg, Germany

### CLIENT RATING

**5.0**

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 4.5

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

Enlivity S.R.L. is helping us develop a custom web app, which is a WordPress-based plug-in. The product is a complex platform since it requires getting information into the web and implementing it on the servers and frontend. Regarding tools and technologies, the team also uses PHP, CSS, and HTML.

Currently, the team is deploying the plug-in and working on expanding the product's skills to take it to an online school for doctors and medical staff for academic purposes.

### What was the team composition?

We've worked with three members of Enlivity S.R.L.'s team, including Robert (Owner), who is my main point of contact.

### How did you come to work with Enlivity S.R.L.?

We found them on an online platform and decided to work with them because Robert understood our requirements for this project in a five-minute call compared to other potential providers proposing solutions that would've never worked out.

### What is the status of this engagement?

We started working together in August 2022, and the engagement is still ongoing.

## The Outcome

### What evidence can you share that demonstrates the impact of the engagement?

Enlivity S.R.L.'s work results have helped us reduce our costs; the development costs are high, but in the end, the maintenance costs are lower than before, which is what we're looking for. Overall, Enlivity S.R.L.'s work success is five stars out of five.

## How did Enlivity S.R.L. perform from a project management standpoint?

Enlivity S.R.L.'s team is responsive and attentive to my requests via email and phone calls.

## What did you find most impressive about them?

Enlivity S.R.L.'s team is highly skilled. Their custom plug-in design and development and understanding of our requirements are impressive – they always have an answer to our inquiries.

## Are there any areas they could improve?

Throughout the process, they've been improving on letting me know how to spend less money on some tasks and make them work out easier.

## Do you have any advice for potential customers?

Be prepared for your first call with the team, and keep an open mind for scaling up the project.
